Hi [redacted]

You can publish your results, but we would like to ask that you send us your results as well in the form of the candidate lists specified in the evaluation document. Also, please send us a link to your paper once it has been published.

You can reference the following IEEE paper:

Mei Ngan; Grother, P., "Tattoo recognition technology - challenge (Tatt-C): an open tattoo database for developing tattoo recognition research," in Identity, Security and Behavior Analysis (ISBA), 2015 IEEE International Conference on , vol., no., pp.1-6, 23-25 March 2015
<http://ieeexplore.ieee.org/stamp/stamp.jsp?tp=&arnumber=7126369>

Many thanks,

[redacted]

Hello,

Thank you for your interest in the NIST Tattoo Recognition Technology – Challenge (Tatt-C). The Tatt-C dataset is now available to researchers on an ongoing basis. Instructions on obtaining the dataset is available on the Tatt-C webpage at <http://www.nist.gov/itl/iad/ig/tatt-c.cfm>.

We'd like to ask researchers to submit their results to NIST whenever possible as we plan on developing an ongoing leaderboard summarizing the current state-of-the-art performance for the various Tatt-C use cases.

Please don't hesitate to send questions or comments to tattoo@nist.gov.

Thank you!

I am writing to request a copy of the Tatt-C dataset, per the instructions on the NIST website. ("The Tatt-C submission period has closed, however, researchers can still obtain the Tatt-C dataset for research purposes. Organizations interested in obtaining the Tatt-C dataset should follow the steps below: OBTAIN the Tatt-C Dataset Fill out the Tatt-C Data Request Form and email it to tattc_dataset@nist.gov. After receipt of the request form, the submitter will receive, via email, a data release document that will need to be signed and further instructions on obtaining the dataset will be provided.")

Please let me know if I need to provide any further information.

Thank you.

Subject: Tatt-C Data Set Request
Date: Tuesday, June 23, 2015 7:22:27 AM

NIST Tatt-C Team,

I am interested in obtaining the tattoo data set that was made available for Tatt-C. While I understand the challenge is over and the workshop has taken place, we would look to evaluate our methods on this data set. Is it possible to still download the data set? If so, could you please provide instructions for doing so? I'm happy to fill out any required forms.

Subject: [External] Re: Tattoo Identification datasets
Hi [REDACTED]

Thank you for your email.

In 2014-2015, NIST organized a Tattoo Recognition Technology – Challenge (Tatt-C) where participants were provided with a dataset and partitions to develop and assess their algorithm performance. While the Tatt-C activity is over, the dataset is still available to interested researchers on an ongoing basis – please visit <http://www.nist.gov/itl/iad/ig/tatt-c.cfm> for instructions on getting a copy of the data. A public report based on the outcomes of Tatt-C was published, which summarizes self-reported performance results from the participating organizations - <http://nvlpubs.nist.gov/nistpubs/ir/2015/NIST.IR.8078.pdf>.

We have an upcoming tattoo evaluation called Tatt-E that will commence in the next month or so that would probably be of interest to you. While Tatt-C was an “open-book” test where the data went to the developers, Tatt-E is a sequestered “closed-book” test where participants would send their software to NIST for evaluation on much larger, sequestered datasets. More information on Tatt-E is available at <http://www.nist.gov/itl/iad/ig/tatt-e.cfm>. We will put you on the mailing list for any Tatt-E announcements that come out.

Please let me know if you have any questions.

Thanks!

Dear NIST

Let me first introduce myself, my name is [REDACTED] at United Technologies Research Centre (UTRC) in Ireland. As partner of the European project LASIE <http://www.lasie-project.eu/>, we are interested to develop some technologies related to the Tattoo identification problem.

I would like to know how can we access to the NIST datasets and if it will be possible to know the results of the state-of-art approaches for these datasets in order to have a baseline for doing a

comparison.

Many thanks

Best regards
